EXPERIENCE

ServiceNow

Feb 2024 – Present

Senior Product Designer — Hyderabad, India

- Lead end-to-end design for Employee Slate, ServiceNow's AI-native Employee Experience product — moving employees from a traditional portal model to agentic, conversational, task-completing workflows.
- Led the design of Employee Slate's guided, intelligent admin configuration experience — applying defaults over configuration, progressive disclosure, and clarity over customization — reducing average configuration time from 200 days (Employee Center) to 7 days.
- Led cross-BU workshops to stress-test Employee Slate's AI-native capabilities across ServiceNow's business units, surfacing edge cases and refining agentic workflows ahead of launch.
- Ran an internal design workshop mapping the end-to-end deskless worker journey, extending Employee Slate's agentic experience to ServiceNow's frontline workforce — a fast-growing focus in enterprise HR tech.
- Use Claude Code to build interactive, functional prototypes for concept validation, cutting prototyping turnaround from 1 week to 3 days.
- Mentor 1 mid-level and 1 junior designer; run regular design critiques.

ADP

Jan 2020 – Feb 2024

Sr. UX Designer — Hyderabad, India

- Owned UX for WFN's Performance Management, designing end-to-end flows for 25k+ clients.
- Led the redesign of the performance management review flow, reducing related support call volume by 70%.
- Designed recruiter-facing customizable hiring workflow per requisition — replacing a rigid standardized workflow that couldn't adapt to different roles, a top pain point in the existing module.
- Designed WFN's Learning Management module from 0 to 1, introducing native learning capabilities directly into the platform — eliminating reliance on third-party LMS tools.
- Contributed to ADP's design system: added the horizontal timeline component with full specs; resolved accessibility issues across several existing components.

Cognizant

Oct 2017 – Jan 2020

UX Designer — Bangalore, India

- Designed Live Support, an internal chat and FAQ platform for Cognizant's associate support system — used daily by 200+ associates, growing ~20% month-over-month.
- Replaced supervisors' manual Excel tracking and agents' Teams-based escalation with built-in tracking, escalation, and quick-response features.
- Conducted research with 6 agents and 2 supervisors to reduce ticket volume handled by L1/L2 teams and lower support operating cost.

EARLY EXPERIENCE

UX Design Intern — Optym (2016)

Contributed to the 3.0 release of HaulPLAN, a web-based logistics platform; led its transition to responsive design.

UX Design Intern — The Minimalist (2015)

Designed user flows, personas, and wireframes for a new platform from initial requirements through prototyping.

UX/UI Design Intern — VivaConnect (2015)

Designed UI/UX for web and mobile ordering apps across several food-service clients.

EDUCATION

IIT Guwahati

Bachelor of Design (B.Des)

2013 – 2017

SKILLS

Strategy & Leadership

- Product strategy
- Stakeholder management
- Mentorship
- 0-to-1 design

AI-Native Design

- AI-assisted prototyping
- Agentic & conversational UX
- AI-native product design

Product Design & Research

- User flows & IA
- Wireframes & high-fidelity UI
- Prototyping & design systems
- Accessibility (WCAG)
- Usability testing
- Data-informed design
